Allowable Subject Matter

1. Claims 1-45 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As per Claims 1, 12, and 22.

The present invention is directed to an ATM machine with internet browser capability.

From pages 7 and 8 of the 4/22/2005 board of appeals decision that provides the reason for allowance as follows. First, Semple does not teach that the computer is operative to cause the cash dispenser (one transaction function device) to operate responsive to instructions in at least one document processed by a browser. And in Semple there is no support therein that a document displayed by the browser can cause the cash dispenser of the ATM to operate. At best, Semple teaches that the computer is operative to cause printer 236 (another transaction function device) to operate responsive to instructions processed by a browser (e.g., the print button in the browser's toolbar, the print command under the File menu). However, Semple does not teach that the print command can operate responsive to instructions in a document processed by a browser

(i.e., a web page). Second, Sigona does not disclose multiple browsers open to accept input and one HTML document able to process user input. Sigona is directed to opening multiple applications. Sigona does not disclose opening multiple browsers. Lastly, the combined teachings of Semple and Sigona would not have made it obvious at the time the invention was made to a person having ordinary skill in the art to have modified Semple so as to arrive at the claimed subject matter.

The claims which depend from the above allowed claims are allowed based on their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
